SHASHANK C J

Software Engineer – Full Stack Development (Java, Python, React & Microservices)

Bengaluru, Karnataka | +91 8197301857 | shashankcj7@gmail.com | linkedin.com/in/shashank-c-j-313696270 | github.com/Shashankcj

PROFESSIONAL SUMMARY

Software Developer with 2 years and 4 months of experience building full-stack applications and backend services using Java, Spring Boot, Python, Django, and React.js. Experienced in REST API development, relational databases, microservices, asynchronous processing, and distributed systems. Hands-on experience with Docker, Kubernetes, CI/CD, and GitOps. Familiar with SDLC processes, Agile development methodologies, software testing, debugging, and troubleshooting, with a focus on delivering reliable and maintainable applications.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, TypeScript

Backend: Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Spring AOP, Hibernate, Django REST Framework, REST APIs, Microservices, Event-Driven Architecture, Distributed Systems, OpenAI API (LLM Integration), RAG, Vector Embeddings

Frontend: React.js, Next.js, Redux Toolkit, RTK Query, Responsive Web Design, HTML5, CSS3, Tailwind CSS, Bootstrap, Material UI, Recharts, WebSockets, Server-Sent Events (SSE)

Databases & Messaging: PostgreSQL, MySQL, MongoDB, Redis, RabbitMQ, Apache Kafka, NATS

DevOps & Infrastructure: Docker, Docker Compose, Kubernetes, NGINX, Git, GitHub Actions, CI/CD, Argo CD, Terraform, Ansible, Linux

Security & Testing: JWT, OAuth 2.0, OpenID Connect, Selenium WebDriver, JUnit, Mockito, Spring Boot Test, MockMvc, Postman, Pytest

WORK EXPERIENCE

Junior Developer — AaptTeknoUS Private Ltd **Feb 2025 – Present**

Microservices-Based Monitoring Web Application

- Developed responsive user interfaces using React.js, Redux Toolkit, RTK Query, reusable JSX components, HTML5, CSS3, and UI frameworks including Tailwind CSS, Bootstrap, and Material UI; implemented Recharts-based real-time data visualization and integrated backend APIs, WebSockets (WSS), and Server-Sent Events (SSE), with error handling for reliable UI experiences.
- Developed backend services using Java Spring MVC and Python Django REST Framework, implementing REST APIs, gRPC, API Gateway, and Eureka Service Discovery, with exception handling, API failure debugging, and troubleshooting.
- Implemented authentication and authorization using Google OpenID Connect, OAuth 2.0 Client Credentials Flow, and JWT access and refresh tokens to support user login and secure API access.
- Integrated OpenAI LLM APIs with a RAG pipeline, generating vector embeddings for document retrieval and streaming chunk-wise AI responses to the React UI.
- Implemented asynchronous task processing and scheduled jobs using Celery, Celery Beat, and Redis, supporting background workloads and caching.
- Integrated RabbitMQ and Apache Kafka for message-driven processing and event distribution, enabling multiple services to consume events independently.
- Containerized application services using Docker and deployed workloads to Kubernetes, supporting service orchestration and cluster operations.
- Implemented CI/CD workflows using Git and GitHub Actions and GitOps-based deployments using Argo CD, supporting automated builds, deployments, and cluster configuration management.
- Worked with Kubernetes Cluster Mesh and cluster networking concepts to support communication across Kubernetes clusters.

Linux System Monitoring and Telemetry Platform

- Developed Python-based Linux monitoring services using psutil to collect CPU, memory, disk, and network metrics, and configured services to run on Linux systems.
- Packaged and prepared the monitoring application for Debian and RHEL-based Linux distributions, supporting installation and deployment across different Linux environments.
- Implemented NATS publish-subscribe messaging between monitoring services and developed a Bridge service to transmit telemetry data to the central server over HTTPS and secure WebSockets (WSS).

Intern — LD App Solution **Jun 2024 – Jan 2025**

Full Stack Web Application Development & Testing

- Developed secure backend REST APIs using Java, Spring MVC, and Spring Security, implementing JWT-based authentication, access control, and CSRF protection to help prevent cross-site request forgery attacks.
- Built responsive web application interfaces using React and Next.js, integrating frontend components with backend APIs to support application functionality and secure user interactions.
- Implemented unit and integration testing for Spring Boot applications using JUnit, Mockito, Spring Boot Test, MockMvc, and Spring Data JPA testing; validated REST APIs using Postman and automated browser workflows using Selenium WebDriver with Java and Python, with Pytest for Python application logic.

EDUCATION

Bachelor of Engineering (BE), Computer Science and Engineering — 6.83 CGPA **2019 – 2023**

Class 12 — PUE Board, Karnataka — 78% 2019

Class 10 — Karnataka State Board — 82.72% 2017
